Brand Highlights

A WORLD OF COLOUR

In response to a strong demand for bespoke finishes, luxury bathing brand Victoria+Albert is proud to launch a new colour service, allowing you to personalise the exterior of their free-standing baths and basins to coordinate with the rest of the bathroom's design. In addition to their existing six standard paint finishes (i.e., Matt White, Matt Black, Gloss Black, Anthracite, Light Gray and Stone Gray), they are now offering a spectrum of 194 RAL colours in either gloss or matt finishes. That means you now have 200 paint selection options available in either gloss or matt finish! Victoria + Albert Baths define "gloss" at a 90% gloss level, and "matt" at a 20% gloss level.

Each finish is multi-layered using a special catalysed paint, with hand polishing between applications. The technique results in an exceptional depth and lustre to the finish, and is considerably more durable than hand painted surfaces.

The exterior paint finishes contrast with the crisp white QUARRYCAST™ interior of the freestanding baths and basins. Renowned by homeowners and designers alike for its durability, QUARRYCAST™ is naturally white, beautifully strong and easy to clean.

Pescadero Series

Cheshire Series

Choose from 194 RAL colours

Roxburgh Series

Matching basins in 194 RAL colours are also available

unique properties.

VICTORIA+ALBERT LAUNCHES THE TAIZU SERIES - A FREE-STANDING ROUND BATH MADE FROM VOLCANIC LIMESTONE

Taizu is Victoria+Albert's first collaboration with renowned Hong Kong based designer, Steve Leung, who is known for using Asian influences in his designs.

The opulent circular bath has been inspired by the fine porcelain designs of the Song Dynasty. The gently sloping sides are softened by a chamfered edge and sculpted detail at the base. With a diameter of 1500mm, Taizu is a spa-style centrepiece that is at home in the most luxurious bathrooms.

In addition to Victoria+Albert's existing six standard paint finishes, Taizu bath can be bespoke in a spectrum of 194 RAL colours, in either gloss or matt finishes.

Interview with designer, Steve Leung, at ISH Frankfurt 2019 where the Taizu Series was launched.

TAAAC – THE ROUND SHAPE OF SQUARE

Designer, Federico Castelli, was inspired to create a faucet and accessory collection that incorporates both Round and Square shapes. The idea was to realise a collection that was styled with maximum adaptability, so that the faucets and accessories will match perfectly with any ceramic sanitary wares (basins and WCs) that have either Round or Square design lines. With this idea perfected, the TAAAC Collection was created.

TAAAC is a complete collection that Design Professionals can specify into bespoke luxury bathroom projects. Explore from a range of unique finishes to achieve the ultimate design look you want for your bathrooms.

SHOWERING AND BATHING IN A SMALL BATHROOM SPACE IS NOW POSSIBLE

Planning a renovation in a small bathroom is always a challenge. Between specifying an area for showering and fitting in a bathtub, the bathtub mostly gets axed. Fret not, there is now a solution to put an end to these choices. The new 'Livorno Easy Series' shower bath by Repabad makes it easy to perform both functions. The shower bath is placed on the bathroom floor in front of the fully tiled wall, and can be installed quickly and simply. Furthermore, the combination tub is also ideal for partial renovations.

With the 'Livorno Easy Series' bathtub, you can achieve the best of both worlds. Switch between a Shower Tray or Bathtub according to your needs. Two safety interlocks automatically lock the door and prevent unintentional opening. In addition, the two-sided back slopes and the central drain allow comfortable bathing for two.

Bathtub Livorno Easy is made of high-quality sanitary acrylic and is available as Right or Left version in the size L180 x W80 x H46 cm. A suitable glass partition can be supplied on request. All Repabad products are proudly Made in Germany.

TECE 
close to you

STYLISH INVISIBLE SHOWER CHANNELS

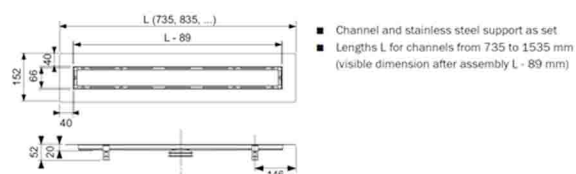

Natural stone floors have their own unmistakable charm. However, it is often somewhat unpractical to install a shower channel in this type of floor. TECE has therefore developed a special channel for natural stone floors that makes installation and sealing far easier. A change has been made to the appearance too: While before, narrow stainless steel edges bordered the drain opening, only a slit is now visible in the natural stone.

You can create an invisible shower drain look using the innovative TECE drainline solution. Whether you use tiles or natural stone (i.e., marble) for your shower floor, we have the perfect solutions to make your designs come to life. TECE drainline is available in a range of sizes (from 735 - 1535mm) to suit most applications.

TECEdrainline natural stone channel

TECE has developed a special channel for natural stone floors. Consisting of a channel body with a support for the natural stone covering and a 4 centimetre wide flange around the outside. This makes installation and sealing far easier. The stone slabs can therefore be laid using both a thin-bed and thick-bed method.

Maintenance & Cleaning Tips

HOW MUCH DO YOU REALLY KNOW ABOUT LIMESTONE?

Q: A quality crystal does not have limestone problems.

A: False

Glass, by its nature, has a porous surface that causes dirt and limestone to settle in irregularities, making removal more difficult. The anti-limescale treatment intervenes creating a sort of protective film that compensates this porosity making the glass more smooth and slippery, able to decrease the amount of water that stops on the glass and limit the adhesion capacity of limestone to the glass itself.

Q: If the glass of the shower box has been treated, it is easier to clean it.

A: True

The TPA facilitates the cleaning of the glass and with a few precautions it is possible to keep the glass of the shower box clean and shiny. It is always advised to remove the calcareous residues of dirt with a soft cloth and dry the shower enclosure after use. The use of a squeegee trowel makes the operation of removing the residual drops or veil of water more convenient and effective.

Q: Once the anti-limescale treatment has been applied, no maintenance is required.

A: False

The duration of the preventive anti-scale treatment depends on the use of the shower enclosure and on the relative maintenance that must be carried out with suitable products.

Use detergents and maintenance kits compatible with the TPA. Products that are too aggressive, abrasive or containing silicones will negate the effect of the treatment.
